

STEPHENS

COMMERCIAL PAINTING

BACKGROUND

The IRG Warehouse faced a significant challenge: the interior of the facility was extremely dark, making it difficult for workers to operate efficiently. Installing additional lighting was considered, but the cost and complexity of such an upgrade were prohibitive. IRG needed a cost-effective solution to brighten up the space without disrupting operations or incurring high costs.

SOLUTION

Stephens Commercial Painting proposed an innovative solution to address IRG's needs without the expense of additional lighting. Our team recommended applying a full-hiding, white coating to the warehouse ceiling. This specialized coating is designed to maximize light reflection, significantly enhancing the overall brightness of the space.

The project was completed efficiently over a 2-week period, with minimal disruption to warehouse operations. Our expert painters carefully prepped the area and applied the

coating, ensuring a smooth, even finish that would optimize light reflection.

RESULTS

The transformation was immediate and dramatic. The newly painted white ceiling significantly brightened the warehouse, improving visibility and creating a more welcoming and productive environment. The need for additional lighting was eliminated, saving IRG thousands of dollars in installation and energy costs.
