

# STEPHENS

## COMMERCIAL PAINTING

### BACKGROUND

ABC Supply faced several challenges in repainting their busy showroom and surrounding offices without interrupting daytime operations. The showroom was constantly in use by employees and customer foot traffic. Additionally, we discovered, the existing company approved paint products and baseboard base color did not meet the ABC corporate specifications leading to an inconsistent color variation from their company standards.

- **Overnight work ensured uninterrupted operations.**
- **Restoration matched original specifications for enhanced durability and aesthetics.**
- **Seamless execution allowed reopening at 6 AM with no disruption to business.**

### SOLUTION

To accommodate ABC Supply's schedule, our team worked overnight. We:

- Planned work after closing and moved office furniture and fixtures which were returned in the morning.
- Repaired wear and tear; dents, nicks and holes on walls and repainted with products from the original company specification.
- Removed banners, posters, and old cove bases.
- Refreshed the bullpen and 10 offices, replacing cove bases and reassembling furniture after painting.

By 6 AM, the showroom was ready for business, with no disruption to daily operations.

### RESULTS

The newly painted showroom and office space were restored, delivering a fresh and polished look. Using materials that matched the original specifications enhanced both the company standards and aesthetics of the space. Most importantly, the project was completed without any interruption to ABC Supply's operations, allowing the facility to reopen seamlessly at 6 AM each morning ensuring business continuity.
