

STEPHENS

COMMERCIAL PAINTING

BACKGROUND

Fielder Church's steeple required repainting to restore its appearance and protect it from weather-related deterioration. The project presented challenges due to the steeple's height and intricate design, necessitating specialized access solutions to ensure worker safety and project efficiency.

- **Custom scaffolding ensured safety and precision**
- **Durable paint extended the steeple's lifespan**
- **Minimal disruption to church operations**

SOLUTION

Stephens Commercial Painting implemented a comprehensive approach by erecting custom scaffolding tailored to the steeple's unique structure. This scaffolding provided secure access to all areas of the steeple, enabling the painting team to perform surface preparation and apply high-quality coatings effectively. The use of scaffolding ensured worker safety and allowed for meticulous attention to detail throughout the project.

RESULTS

The project was completed successfully, resulting in a rejuvenated steeple that enhances the church's overall aesthetic appeal. The fresh paint provides a durable protective layer against environmental elements, extending the steeple's lifespan. The efficient execution of the project minimized disruption to church activities, demonstrating Stephens Commercial Painting's commitment to delivering quality workmanship with minimal impact on client operations.
